Originally founded as a family business, the SIGVARIS® brand today throughout the world stands for medical compression stockings that are of highest quality.

Consistent with our claim – life for legs – we would like to enable patients with venous problems to lead an active life. We continuously develop our know-how that is based on decades of experience and use the newest medical and technical information.

Personal engagement, modern technology and collaboration with internationally recognized medical specialists drive the further development of our products onward. And also the preferences of our partners and customers continuously play a role in the development of our product line. Thus, SIGVARIS stockings today not only stand for medical effectiveness, but also for vitality and endurance, for aesthetics and wearing comfort, as well as for individuality and flexibility.

This catalogue provides you with a comprehensive overview of our product line. It contains the entire SIGVARIS product line. This means that a compression stocking is available for each need along with appropriate optional items, as well as helpful instructions on how to take the pertinent measurements. The catalogue should serve as a practical reference and thus provide the basis for communicating specialized information to others.

Participate in our mission and collaborate on a daily basis with SIGVARIS for healthy legs. We wish you much success.
For each wish the appropriate detail.

It is especially the details that characterize the high quality medical compression stockings made by SIGVARIS. In addition to their medical effectiveness, the products exhibit excellent workmanship extending to the toes and offer a variety of valuable properties.

ON THE FOOT:
- Flexible adjusting foot size «one size» in models with closed toes
- Soft toes and fine toe seams
- Extra reinforced toes and heels

CALF STOCKING:
- Wide, smooth and soft calf board does not constrict
- Also available in PLUS sizes for larger calf circumferences
- Flat transitional seams to the calf board

THIGH STOCKING WITH GRIP TOP:
- Also available in PLUS sizes for larger thigh circumferences
- Stable and comfortable flat transitional seams from stocking to grip top
- Perfect, edge of cut separated with ultrasound for soft and smooth grip top connecting seams
- Functional grip tops that take into consideration a great variety of leg shapes and skin consistencies
- Grip tops with a skin-friendly internal coated area of silicon
- Neutral knobbed grip top
- Exclusive satin knobbed grip top in an attractive design
- Transparent lace grip top with diamond-shaped structure
- Grip top with soft protective seam

THIGH STOCKING WITH WAIST ATTACHMENT:
- Soft waist belt, variable in length
- Ergonomically designed lateral panty bodyform
- Soft, elastic binding

PANTY:
- Also available in PLUS sizes for larger body circumferences
- Tactile soft bodyform with pleasant appearance
- Small crotch, even in PLUS bodyforms
- Flat seams and wide smooth top band
- Retractable elastic band for individual adjustment
- Panty with a highly elastic bodyform
- Compressing, forming panty section in the panty bodyform
- During pregnancy, the bodyform of the Panty Materna «grows along» with the wearer
- As well as an extra wide and highly elastic top band
- Retractable elastic band for individual adjustment
- Panty with a highly elastic bodyform
- Compressing, forming panty section in the panty bodyform
- During pregnancy, the bodyform of the Panty Materna «grows along» with the wearer
- As well as an extra wide and highly elastic top band

SIGVARIS fulfills all quality and testing requirements of the RAL German Institute for Quality Assurance and Certification e.V. for medical compression stockings and, thus, also DIN 58133.

Medical compression stockings by SIGVARIS undergo human ecological testing and conform to the internationally binding Eco-Tex Standard 100.

All medical compression stockings by SIGVARIS conform to the fundamental safety and health requirements of the pertinent EU guidelines.
MAGIC – Satisfaction at its best!

Versatility that is enchanting.

MAGIC is the compression stocking that simply fits all women: For every occasion, every age and every requirement. MAGIC is so versatile that it fulfills the most diverse expectations.

• Large selection of versions and models  
• Large selection of sizes  
• Various type-appropriate skin tones as well as additional favourite colours

Thus, you can recommend MAGIC to any female customer in compression class 1 or 2 at any time.

• For every occasion  
• For every age  
• For every type

The Market Research Institute GfK has concluded that wearers of compression stockings are very satisfied with MAGIC.
MAGIC – Attractive for all.

Its natural appearance on the leg results in enthusiasm.

Naturally, MAGIC is a medical device. Yet on the leg it acts like an item of clothing that can be worn with any outfit and in any circumstances.

SATIN KNOBBED GRIP TOP (SKGT)
Soft skin friendly knobs provide a pleasant soft sensation on the skin.

LACE GRIP TOP (LGT)
Transparent lace grip tops provide a secure hold and emphasize the feminine.

CALF STOCKING OPEN
Ideal in Summer: lets the toes have some air – and that is a good feeling.

CALF STOCKING CLOSED
Soft toes with a fine toe seam guarantee the ultimate in wearing comfort.

THIGH STOCKINGS SKGT + LGT
Depending on the shape of the leg and the skin tissue, your customers can choose between a satin knobbed or lace grip top.

PANTY
For women who simply feel better in panties.
With a slight «push up» effect.
Also available for pregnant women and larger sizes as Panty Materna with an extra wide top band.

MAGIC – THE COMPRESSION STOCKING, FULFILLS ALL YOUR WISHES.
MAGIC – Perfect fit.

MAGIC is available in up to 24 sizes and many model versions have a sophisticated selection of colours – as well as a made-to-measure option. In this diversity of choice each customer can find exactly the right stocking.

MAGIC – THE COMPRESSION STOCKING, FULFILLS ALL YOUR WISHES.
COMFORT – The all-rounder for Him and for Her.

Simply comfortable – all day long.

High quality yarns ensure a soft grip and simple handling. Thus, COMFORT is an uncomplicated companion that always fits and participates in all activities.

- Always fits and fits everywhere
- Highly versatile, can be worn anytime, anywhere.
- Up to 24 different sizes
- Even more versions

Recommend COMFORT to all men and women who are looking for an opaque compression stocking.
COMFORT – All-day comfort.

The compression stocking for Him and for Her.

Already when putting it on, COMFORT optimally adapts to even unusual measurements. Its soft knitted fabric with simply wound, high value yarn results in an especially soft quality and a likewise comfortable wearing experience.

- Convenient: Easy to put on and take off
- Comfortable: Optimum fit
- Pleasant to wear: Comfortably soft and smooth
- Attractive: Opaque and in attractive colours

**KNOBBED GRIP TOP (KGT)**
Soft knobs prevent the stocking from slipping for a secure hold – all day long.

**SATIN KNOBBED GRIP TOP (SKGT)**
For all those who want to combine the proven knobbéd structure with an exclusive design.

**LACE GRIP TOP (LGT)**
The transparent lace grip top with diamond-shaped silicon coated area goes down well with women and amazes men.

**SOFT TOP (ST)**
The elastic soft top adapts to the leg and provides comfortable support.

**CALF STOCKING OPEN**
Ideal in Summer: lets the toes have some air – and that is a good feeling.

**CALF STOCKING CLOSED**
Soft toes with a fine toe seam as well as an additionally reinforced heel and an ergonomic foot design ensure the ultimate in wearing comfort.

**THIGH STOCKING KGT + SKGT OR LGT**
Knobbéd, satin knobbéd or lace grip top - depending on the shape of the leg and skin tissue includes the perfect fit for everyone.

**THIGH STOCKING WITH WAIST ATTACHMENT**
For special requirements.

**PANTY**
Also as Panty Bodyform with compressing panty section. Also available for pregnant women and larger sizes as Panty Materna with an extra wide top band.
COMFORT – All sizes, all colours.

COMFORT is available in appealing, easily combinable colours, many model versions in up to 24 sizes – and is furthermore also available in a made-to-measure option. Thus, women and men with the most varying leg measurements can benefit from the soft quality of the all-rounder. However, also be sure to mention the broad selection of colours with six attractive tints.
Whether for leisure time, sports or on the job, a person who values pure nature chooses COTTON.

Even for sensitive skin, COTTON makes every activity a pleasant wearing experience. Elastic yarns provide an all around good feeling. And the perfect fit is ensured by an innovative knitted weave.

Thus, COTTON is also very much liked by men and is ideal for all situations in which natural wearing comfort is required.

• For a natural feeling of well-being with cotton
• Natural appearance
• Perfect fit

GfK

The independent GfK market research institute conducted a survey among COTTON test wearers on behalf of SIGVARIS®

• The majority of the test subjects stated their quality of life improved significantly while wearing COTTON.
COTTON – Purely natural.

Cotton for feeling well

High quality cotton provides a comfortable sense of well-being. Simultaneously, special multifilament yarns ensure perfect elasticity. Thus, COTTON is suitable for persons who like to be active as well as for patients with sensitive skin. Men also experience that all around sensation of feeling well.

• For all indications of compression classes 1, 2 and 3
• Fine ribbing appearance, for women and men
• Swiss Cotton: The world’s best cotton yarn
COTTON – Naturally in all sizes.

In each daily activity COTTON is the ideal companion. For all those who value natural fibres and a natural look, COTTON is the perfect choice. It is available in all sizes and many classic colours. Three different COTTON product lines means a perfect fit for all.

Whenever high medical effectiveness is important, TRADITIONAL is the reliable classic.

Thus, it is the therapeutic measure of first choice – for example after thromboses, in chronic venous disorders or in lymphatic diseases. Since TRADITIONAL is especially elastic and air-permeable, it is wonderful to wear. Day after day, it provides a feeling of confidence in the legs and thus ensures medical compression of the highest level. The doubly wound inlaid thread made of natural rubber adapts wonderfully to the leg and the neutral skin tone harmonizes with any type of clothing.

Furthermore: TRADITIONAL can be perfectly combined with all fine stockings!

- Highest pressure stability throughout the entire day
- Excellent force-elasticity relationship
- High medical effectiveness for a safe and successful therapy
TRADITIONAL – A true classic.

Effectiveness at the highest level.

Technically complicated refined natural rubber makes TRADITIONAL strong in every respect.

The unique force-elasticity relationship and highest pressure stability throughout the entire day ensure an effective treatment of severe venous diseases and provide safety during therapy.

**ONE LEG PANTY AND ONE LEG PANTY WITH BODY PART IN SLIP FORM**

As an alternative to using a thigh stocking with waist attachment.

**CALF STOCKING [A-D] WITH GRIP TOP**

Prevents slipping in conically shaped lower legs.

**PANTY FOR MEN**

Can be delivered with a fly placed on the left, right or horizontally.
COMPRESSION THERAPY – MEDICAL COMPETENCE

Venous disorders and diseases

Varicose veins are a very common condition throughout the world. Between 20 and 30% of the population have varicose veins, with women being affected slightly more often than men. Advanced chronic venous insufficiency, ranging from skin changes to leg and foot ulcers, occurs in less than 10% (4–9% in various studies).

Medical expertise and textile know-how

Medical expertise and textile know-how are the cornerstones of SIGVARIS corporate strategy. They enable SIGVARIS to produce compression stockings that rectify leg complaints for those affected, while preventing the advance of venous disorders. SIGVARIS brand stockings offer proven medical effectiveness, excellent comfort for the wearer and fashionable design.

Medical compression therapy to meet the highest standards

SIGVARIS collaborates closely with leading doctors and scientists in the production development sector. Spreading knowledge about medical compression therapy is another of SIGVARIS’ key concerns. For every individual need SIGVARIS products are designed to be in perfect keeping with the needs and wishes of the doctors who prescribe them and the users who wear them. Compression stockings from SIGVARIS are prescribed by doctors and issued to patients by specialists.

«Leg compression by elastic hosiery started in the post-acute phase has been shown to reduce the incidence of the post-thrombotic syndrome.»

SIGVARIS – LIFE FOR LEGS

No other manufacturer of medical compression stockings promotes so actively new evidence-based knowledge about compression therapy. SIGVARIS stands for medical competence with a world-wide network of renowned phlebologists. As well as offering high quality standards and the typical precision of a Swiss manufacturer, SIGVARIS is the world-wide number one in the field of therapy with medical compression stockings. SIGVARIS offers a unique assortment of medical compression stockings. Whether series-produced or made to measure, whether made of natural or high-tech fibers, SIGVARIS can provide the appropriate compression stocking for each and every lifestyle and for each and every patient.
Compression After Surgery

**After venous surgery (post-surgery)**

The graduation of SIGVARIS Compression stockings is correct and constant during the entire time of wearing the stocking, giving a maximum success rate. Depending on the scale of the operation and the subsequent result, medical compression stockings should generally be worn between one week in very simple cases and up to 3 months in difficult cases. **Thanks to its special knitting technique, the post-operative compression stocking is designed to ensure a firm and constant pressure, even in the area of the thigh.**

When therapy is ongoing, such as in sclerotherapy for lateral branch varicose veins or also spider-burst veins, the compression therapy should be continued accordingly.

The elastic fibers of this special stocking are made of natural rubber (elastodiene). An important characteristic is their absolute fatigue resistance. It is vital for the compression to remain stable all day long, thus preventing bruising and edema as far as possible. The free mobility of the ankle is guaranteed, and because the stocking is not bulky, the patient can wear his normal shoes. The patient’s mobility is not compromised.

As postoperative treatment, the compression stocking can also be worn during nighttime.

The post surgery stocking is available as a kit.

Treating varicose ulcers successfully

Varicose ulcers are the most severe consequence of venous diseases and affect roughly one person in 50. It is possible to fight effectively against the decisive mechanisms leading up to the formation of an ulcer by means of compression therapy. These mechanisms consist of hemodynamic modifications in the veins (stasis, venous reflux, turbulence) with overloading of the vein pumps of the legs and consequent modifications of the microcirculation that ultimately become self-perpetuating (edema, thrombosis, hemorrhaging, ischemia/reperfusion, tissue destruction/repair, etc.).

Innovation meets Tradition: SIGVARIS ULCER X

An innovative and patented thin understocking combined with the proven and highly successful original TRADITIONAL compression class 2 (+503+): SIGVARIS ULCER X.

The SIGVARIS ULCER X kit consists of a new patented1 understocking plus the calf-length version of the legendary SIGVARIS TRADITIONAL compression class 2 (+503+) compression stocking, which is being mentioned in numerous clinical studies as product of choice. The use of natural yarns (cotton and natural rubber respectively) makes the stockings particularly comfortable to wear, giving it a natural feel: SIGVARIS TRADITIONAL consists of double-covered natural rubber featuring unique pressure stability that has yet to be beaten. Understocking: the foot part is made of a very slippery material (polyamide/double-covered elasthane) no foot slip required, acts as a donning aid at the same time.

SIGVARIS ULCER X – scientifically-proven solution2

• ULCER X: 96.2% complete wound closure (compared to 70% for short-stretch bandages)
• Ulcers healed twice as fast with ULCER X as with bandages
• Patients reported less pain and discomfort when using ULCER X

## ADDITIONAL ARTICLES

### FOOT SLIP
Available per piece or in a showbox with 50 foot slips.

### RUBBER GLOVES
- small
- medium
- large

Due to the friction SIGVARIS rubber gloves create it is much easier to put on and remove the stockings and panty stockings.

- Minimum order: 12 pairs (per size)

### LATEX-FREE GLOVES
- small
- medium
- large
- x-large

The ideal accessory to put on, remove and extend the life of SIGVARIS compression stockings.

### SPECIAL GLUE «IT STAYS»
- It stays is a gentle roll on body adhesive to hold compression stockings on legs or arms in place.
- This adhesive may be used also for the attachment of orthopedic and surgical devices.
- Simply roll onto skin and press article in place.
- It stays washes off with water, leaving no stain.

- Packing: 12 pieces in a showbox
- Minimum order: 12 bottles

### SOS — SLIP-ON-SIGVARIS — STOCKING AID
SOS is a device which facilitates the putting on of medical elastic stockings and panty stockings. SOS is easy to handle and can be used for all sizes of stockings.

- Available singly

### SIGVARIS WASHING SOLUTIONS (SWS)
Quality washing solution for medical compression stockings and pantyhose.

SIGVARIS WASHING SOLUTION (SWS) fulfills all the special requirements for the optimum care of medical stockings and may also be used to wash all fine lingerie.

- Packing: 6 bottles in a showbox
- Minimum order: 6 bottles

### CLEAN-PAD
Disposable pad for regular cleaning of SIGVARIS medical compression stockings silicon grip tops.

Cleans grip tops from impurities and improves adhesion.

- Contains no alcohol.
- Packing: 10 pieces in a showbox. 8 Showboxes per carton.

### SMS (SIGVARIS MEASUREMENT SYSTEM)
Measurement Device for Medical Compression Stockings.

The newest medical research shows that a compression stocking fitted to a standing patient leads to better fitting and therefore to better compliance by patients. SIGVARIS® offers a measuring device which takes this new knowledge into consideration. SIGVARIS Measurement System (SMS) is a simple, easy-to-handle device for measuring the leg circumference and length for the fitting of medical compression stockings.

Its main characteristics are as follows:

- Can be used for standard and made-to-measure stockings
- Suitable for measurements on a standing (or supine) patient
- Length and circumference are measured simultaneously
- Foldable, easily transportable
TAKING MEASUREMENTS

Standard stockings

**CIRCUMFERENCE**

- **cB** Measure at the thinnest part at the ankle.

- **cD** Measure at head of fibula or 2 cm below knee.

- **cG** Measure approx. 5 cm below the crotch.

**LENGTH**

- **cD** Measure the length inside from heel to point d.

- **cG** Measure the length inside from heel to point g.

**WHEN**

Take the measurements first thing in the morning when possible. The legs should be free of oedema/swelling.

Standard stockings

**CIRCUMFERENCE**

TAKING MEASUREMENTS

Custom-Made stockings

**CIRCUMFERENCE**

**CALF**
- cA: Measure the circumference of the foot at the head of the metatarsus.
- cY: Measure heel/in step. Foot in maximum dorsiflexure.
- cB: Measure at the thinnest part at the ankle.
- cC: Measure at the widest circumference of the calf.
- cB1: Measure at the beginning of the calf muscle/exit of achilles-tendon.
- cE: Measure over the middle of the patella. The knee should be slightly flexed.
- cF: Measure at mid-thigh.
- cG: Measure approx. 5 cm below the crotch.
- cH: Measure at the biggest circumference of the hip.
- cT: Measure at the waist.

**THIGH**
- C: Measure at the biggest circumference of the hip.
- E: Measure at the straight leg from the heel to point e.
- F: Measure the length inside from heel to point f.
- G: Measure the length inside from heel to point g.

**PANTY**
- H: Measure at the biggest circumference of the hip.
- T: Measure at the waist.

**LENGTH**

**CALF**
- EA: Open toe: Measure from the head of the metatarsus to the heel.
- EB: Closed toe: Measure from the tip-toe to the heel.
- EB1: Measure the length inside from heel to point b.
- EC: Measure the length inside from heel to point c.
- ED: Measure the length inside from heel to point d.

**THIGH**
- C: Measure the length inside from heel to point c.
- E: Measure at the straight leg from the heel to point e.
- F: Measure the length inside from heel to point f.

**PANTY**
- T: Measure the length from heel to the waist.
- GT: Panty section front: Measurement from crotch to waist.
- GT: Panty section back: Measurement from bottom-wrinkle to waist.

**Additional measurements**

**CALF**
- CALF PANTY: additional measurements to the calf measures.

**THIGH**
- THIGH: additional measurements to the calf measures.

**PANTY**
- PANTY: additional measurements to the calf and thigh measures.

**Open toe**
- Measure from the head of the metatarsus to the heel.

**Closed toe**
- Measure from the tip-toe to the heel.
Indications:
- Functional disorders such as heaviness and fatigue in the legs, without existing varicosity (C0*)
- Mild varicosities with subjective manifestations (small varicose dilatation of the cutaneous veins, reticular varices) (C1–C2*)
- Varicosities during pregnancy, without edema (C2*)
- Varicosities during pregnancy, with edema (C3*)
- Edema in the evening, due to local causes (venous) (C3*)
- Primary varicosities with edema (C3*)
- Advanced primary varicosities with edema (stem and branch varices) (C3*)
- Chronic venous insufficiency (CVI)
  - Grade I (C3*)
  - Grade II (C4*)
- Coronary phlebitis paraplantaris chronic oedema, eczema, erythema, hypodermitis, dermatoarteriosclerosis, dermite ocre, atrophie blanche
- Healed ulcer cruris
- Prophylaxis of thrombosis/embolism
- Thrombophlebitis or varicocoele (superficial thrombosis), possibly with oedema
- Thrombophlebitis (deep vein thrombosis)
- Postthrombotic oedema with or without secondary follow-up therapy
- To maintain success of therapy:
  a) after sclerotherapy
  b) after ambulatory selective varicose surgery
  c) after stripping
- Before sclerotherapy or before surgery to prevent oedema
- Ulcer prevention and ulcer therapy
- Postoperative oedema
- Posttraumatic oedema
- Reversible lymphoedema after complex physical decongestant therapy
- Inedema lymphoedema with pronounced induration after complex physical decongestant therapy
- Lipoedema grade II and higher
- Cyclic idiopathic oedema
- Congestion caused by immobility (arthrogenic congestion syndrome, paresis and partial paresis of the extremities)
- Angiodyplasia

Absolute Contraindications:
Advanced peripheral arterial occlusive disease, congestive heart failure, septic phlebitis, inflammation of the vein caused by microorganisms, phlegmasia caerulea dolens.

Relative Contraindications:
Clawing dermatoses, intolerance of compression stocking material, sensory loss of the extremity, advanced peripheral neuropathy (e.g. diabetes mellitus, rheumatoid arthritis (RA).

No liability accepted in case of non-observance of these contraindications.

Pressures values in the ankle region:

<table>

</tbody>
</table>

Up to 2 cm greater leg circumference measurements at cC, cF or cG increase the remaining pressure by at most 5%.

The measurement areas and pressure values of our SIGVARIS stockings and panties are periodically checked according to the Hohenstein method.

Packaging:
1 pair per box
Model «thigh with waist attachment»: ½ pair per box
Instructions for putting on/removing/proper care
Foot slip is added to all models with open toe

All SIGVARIS compression stockings and compression panties conform to the GZG guidelines.

SAMSON BY SIGVARIS
Powerful and vital all day long
Specially developed with the anatomy of men’s legs in mind: this stocking will give support no matter what surprises the day might bring. No matter whether you have a sedentary job or stand all day, whether you spend time in the office or during leisure, SIGVARIS will get your legs going and ensure you a powerful and dynamic appearance. It comes not only in a versatile range of four different colours which may be combined in any way, it also has an attractive ribbed texture.

TRAVENO
Travel socks for ladies and men
Your personal travel companion.
Traveno is the only travel sock to feature Meryl® Skinlife – the innovative yarn made of breathable microfibres, for maximum comfort. Meryl® Skinlife has a bacteriostatic effect and protects against smells and skin irritation. Gentle pressure promotes circulation to the legs. Taking care of Traveno stockings is easy. Wash and wear them – they dry three times faster than wool, due to their innovative material.

Medically tested.
Studies and recognised doctors confirm the beneficial effect of support and compression stockings, worn during long journeys. Benefits of Traveno:
• intensive support
• reduced swelling
• ideal for long journeys
• breathable and easy care

SIGVARIS TRADITIONAL – Natural Rubber Quality

**INDICATIONS**
- for recent lymphedemas that will subside rapidly and are soft
- post-mastectomy edema occurring late following radiotherapy
- post-operative and posttraumatic edema after completion of basic treatment
- polyarthritis in certain cases
- treatment by elastic compression for burns and extensive scarring

**CONTRAINDICATIONS**
- uncontrolled lymphedema
- inflammation

No liability in case of nonobservance of contraindications.

**Additional comments:** A manifest lymphedema requires a complex, medically prescribed decongestive treatment. Regular examinations by a physician are necessary to maintain the result. In case of acute pain of skin consult your doctor immediately.
**ARM SLEEVES**

**SIGVARIS BASIC – Fine Quality**

**INDICATIONS**
- prevention of lymphedemas after surgery, e.g., after mastectomy, with or without radiotherapy
- minimal lymphedema
- prevention of relapse after completion of decongestive therapy

**CONTRAINDICATIONS**
- pronounced or unreduced lymphedema
- inflammation

No liability in case of nonobservance of contraindications

Additional comments: A marked lymphedema requires a complex, medically prescribed decongestive treatment. Regular examinations by a physician are necessary to maintain the result. In case of acute pain or skin consult your doctor immediately.

**CIRCUMFERENCE**
- cf = Circumference of the arm at the thickest place
- cd = Circumference of the arm at mid forearm
